

# Indiana: Impact of COVID-19 on the Physical Therapy Profession

Data collected between April 24 and May 11, 2020

## Response Count

169

## Locations

## Facility

Total number of respondents to this question was 169. The number in parentheses is the number of who provided each response.

## Percent of PTs Whose Work Hours Declined

The total number of respondents to this question was 120. The number in parentheses is the number of respondents who answered that their work hours declined out of the total responses for the practice facility. Facilities without a bar mean that no respondents indicated that their work hours declined. The % across all settings total includes all responses.

## Percent of PTs Whose Caseload of Direct Patients Declined

The total number of respondents to this question was 90. The number in parentheses is the number of respondents who answered that their caseload declined out of the total responses for the practice facility. Facilities without a bar mean that no respondents indicated that their caseload of direct patients declined. The % across all settings total includes all responses.

## Percent of PTs Whose Caseload of Physician-Referred Patients Declined

The total number of respondents to this question was 92. The number in parentheses is the number of respondents who answered that their caseload declined out of the total responses for the practice facility. Facilities without a bar mean that no respondents indicated that their caseload of physician-referred patients declined. The % across all settings total includes all responses.

## Percent of Respondents Whose Income Declined

The total number of respondents to this question was 133. The number in parentheses is the total number of who provided each response.

State aggregate PT and PTA data reported due to the small number of responses in some facilities.

## Employment Loss by Facility

	PT				PTA		
	Laid off	Furloughed	Resigned/ quit	None of the above	Laid off	Furloughed	None of the above
